KEY ADVANTAGES OF ARCOM PRODUCTS

The company designs and manufactures innovative mobile storage systems for a wide range of goods. These are modular steel cages, pallets, and rack systems.

- No assembly or floor anchoring required
- They **can be stacked** using standard forklift trucks
- Warehouses built with these systems **can be relocated quickly** from one place to another without reloading the goods
- Product lifespan reaches up to **20 years**
- Stored items can be **up to 6 metres long**
- They make it **possible to use warehouse height up to 11 metres**
- **The products are foldable** and take up very little space when not in use
- The load capacity of a single module is typically **1,000 kg**, but we also offer solutions for loads up to **4,000 kg**
